Formula Enriched with Linen Seeds & Castor Oil

Combines beauty style and shape with the styling line

- ✓ Water-Soluble Modeling Wax
- ✓ Memory Gel
- ✓ Gloss Spray
- ✓ Liquid Crystals
- ✓ Double Tips Fluid

Water-Soluble Modeling Wax

To create, define, give a natural gloss to any type of hair.

It gives a natural support if used on dry hair, creates a natural and soft wet effect if used on slightly damp hair. It does not dry, does not stick together and leaves no residue.

How to use:

Massage between your hands and distribute on hair from the roots to give support and on the tips to define the hairstyle.

Memory Gel

A fixative gel for a gentle final styling.

For pressed hair it is enough to move the fingers in the hair to resume the hairstyle given earlier (hairstyle memory). It does not dry, does not stick hair together and leaves your hands soft and fragrant.

How to use:

Apply the right amount on your fingers and massage on dry or damp hair. Creates a soft and continuous fixation.

Gloss Fluid spray

With emollient action enriched with LINEN SEEDS, gives gloss and elasticity. It can be used on both wet and dry hair for a charming brightness.

It makes your hair soft without making it heavy.

Liquid Crystals

A fluid that can be applied on both damp hair to facilitate drying and to increase the level of softness, as well as on dry tresses for a long fixation.

For a particularly frizzy hair that make a perfectly smooth haircut difficult, apply it immediately after the shampoo on towel dried hair.

Formula Enriched with LINEN SEEDS

Use only on hair lengths and not on the roots.

Double Tips Fluid

Contains special silicones that wrap the tips in a protective and smoothing film. For the best results use this every after every 3 washes with shampoo . The silicone coating resists several shampoos. Just a little amount of product is enough to have gorgeous hair.

Formula enriched with LINEN SEEDS.

Use only on hair lengths and not on the roots.
